A COMPREHENSIVE STUDY OF KUSTHA (SAUSSUREA LAPPA (C.B. CLARKE) IN BRIHATTRAYI AND LAGHUTTRAYI**Vahisht Kiran^{1*}, Singh D.C.², Thakur Vivek³**¹Ph.D. Scholar, Department of Dravyaguna, I.M.S, B.H.U, Varanasi, India.²Professor and HOD, Department of Dravyaguna, Uttarakhand Ayurved University, Rishikul Campus, Haridwar.³M.D. Scholar, Department of Rasa-Shastra & Bhaishjya Kalpana, Uttarakhand Ayurved University, Rishikul Campus, Haridwar, India.**KEYWORDS:** *Brihatrayi kala, Laghutrayi, Kustha (Saussurea lappa (C.B. Clarke)).***ABSTRACT**

Brihatrayi (Greater triad) and *Laghutrayi* (Lesser triad) are excellent, highly esteemed and extensively used sources of Ayurvedic knowledge. *Brihatrayi* comprises *Charaka samhita*, *Sushruta samhita* and *Astanga Hridaya* and *Laghutrayi* comprises *Madhava nidana*, *Sharangdhar samhita* and *Bhava prakasha*. *Ayurveda* delineates the uses of *Kustha (Saussurea lappa (C.B. Clarke))* for the management of different diseased conditions. Most of the *Samhita Grantha* have mentioned it in the treatment of *Kustha*, *Shvitra* (skin disease), *Vata vyadhi* (epilepsy), *Arsha* (piles), *Mutrakricha* (difficulty in micturition), *Jvara* (fever) and *Vrana prasadana* (wound healing). This article reviews the various references of *Kustha* in *Brihatrayi* and *Laghutrayi*, regarding its different formulations and its prime therapeutic indications.

Email: vahishtkiran312@yahoo.com**INTRODUCTION**

Drug consists of the dried root *Saussurea costus* (Falc.) Lipsch. (syn. *Saussurea lappa* (Decne.) C.B. Clarke) family Asteraceae. The plant is a perennial herb about 1-2 meters in height, distributed in Himalayas, Kashmir eastward at an altitude between 2500-3000 meters and also cultivated in Himachal Pradesh, Uttarakhand and Sikkim.^[1] *Saussurea lappa* (C.B. Clark) is a tall, robust perennial herb. Its stem erect, 1.2m-2m high. It has simple, alternate, opposite or whorled leaves. Leaves are membranous, irregularly toothed; basal one very large, 0.6-1.2m long, triangular, with a long lobately winged stalk. Stem leaves are smaller. Flowers heads, stalk less, hard, rounded, 2.5-3.8 cm. dia., 2-5 forming axillary and terminal clusters. Bracts surrounding the heads many, ovate-lanceolate, long, pointed, rigid, bent back, hairless. Corolla 2 cm. long, tubular, dark blue-purple or almost black. Stamens free. Anther tails fringed. Achene- 3mm. long curved and compressed. Pappus hairs 1.7cm long, brown, all feathery. Fruit achene, up to 8mm long, compressed, curved, tip narrowed, with 1 rib on each face, top contracted, cupped. Root is stout, up to 60cm

long brownish with longitudinal streaks and furrows with reticulate surface, having characteristic odor.^[2]

It act as *Shukrala*, *Vataraktahara*, *Vishapahara*, *Kashaghna*, *Kusthaghna*, *Vataghna*, *Raktashodhaka*, *Varnya*, *Deepana*, *Pacchana*, *Vajikara*, *Rasayana* and *Twakadoshahara*.^[3]

Material and Methods**1. Kustha (Saussurea lappa (C.B. Clarke) in Brihatrayi****a) Charaka Samhita: - (1000 B.C.-4th A.D.)^[4]**

It is first of three most important treatise of *Ayurveda*, which are jointly known as *Brihatrayi*. In "*Charaka Samhita*" *Kustha* has been described in *Shukra shodhana Mahakashaya*, *Lekhaniya Mahakashaya*, *Asthanopanaga Gana*, *Katuka Skandha*. It is also described under the name of *Pakala* and *Vapya* in some preparation. This is used as an ingredient of many preparations for external and internal medication is cited below:

b) Sushruta Samhita: - (1000 B.C.-2nd A.D.)^[5]

Sushruta Samhita authorised by *Vridhha Sushruta* is the next most important treatise of *Ayurveda*, *Sushruta* was basically a surgeon, yet he has discussed aetiology, diagnosis and treatment of diseases in a very scientific way in his treatise. He also recognized *Kustha* as an important drug for clinical practice and while classifying the drug on the basis of their pharmacological actions he placed this drug in *Eladi Gana*. As an ingredient of specific formulation or as a member of various groups of drugs in *Sushruta Samhita* are cited below:

(c) Ashtanga Hridaya: - (7th A.D.)^[6]

This is third most important treatise among *Brihatrayi*, written by *Acharya Vagbhata*. Subjects are very precisely collected and described in this book. *Vagabhata* followed *Charaka* and *Shusruta* regarding importance and use of *Kustha*. References of *Kustha* traced in this treatise are mentioned below:-

Kustha (Saussurea lappa (C.B. Clarke) in Laghutrayi

a) *Madhava Nidana* (7thA.D.)^[7]

It is first of three most important treatise of *Ayurveda*, which are jointly known as *Laghutrayi*. In *Madhava Nidana* *Kustha* has not been described.

b) *Sharangdhara Samhita*: (13th A.D.)^[8]

It is second of three most important treatise of *Ayurveda*, which are jointly known as *Laghutrayi*. In this *Samhita* *Kustha* has been described in many diseases as an ingredient of different preparation. The detail descriptions are cited below:

S. No.	Name of preparation/ Gana / Group of Drugs	Indication	Reference
1.	<i>Brahmyadi Swarasa</i>	<i>Unmada Chikitsa</i>	Sa.S.M.1/18
2.	<i>Kwatha Kalpana</i>	<i>Sutikajwara, Kasa, Shwasa, murchha</i>	Sa.S.M.2/47

c) Bhavaprakasha Chikitsa: - (16th A.D.)^[9]

This is third most important treatise among *Laghutrayi*, written by Acharya Bhava Mishra. In *Bhava Prakasha* different preparations of *Kustha* has been described which are indicated in various diseases such as *Medoroga* etc. are cited below:-

S. No.	Name of preparation/ Gana / Group of Drugs	Indication	Reference
1.	Lakshadi Taila (Dwitiya)	Jwara, Kshaya, Unmada, Swasha, Apasmara, Vata roga	B.P.Chi.1/151
2.	Maha lakshadi Taila	-do-	B.P.Chi.1/153-157
3.	Dashamuladi Kwatha	Vata Jwara Nashaka	B.P.Chi.1/300-302
4.	Darusatakha lepa	Suladhman chikitsa	B.P.Chi.1/333
5.	Marichyadi Kwatha	Kaphaja Jwara chikitsa	B.P.Chi.1/385
6.	Marichyadi Uddhulana (Dusting)	Excessive Sweating	B.P.Chi.1/420
7.	Saindhavadi Nashya	Sannipatjanya Tandra	B.P.Chi.1/547
8.	Parpatadi Kwatha	Pittakapholavana sannipata jwara	B.P.Chi.1/635
9.	Shringyadi Kwatha	Abhinyasha chikitsa	B.P.Chi.1/652-657
10.	Sadguna TakraTaila	Mardana in Jwara,daha	B.P.Chi.1/789
11.	Maha Sadguna TakraTailaa	Mardana in sarva Jwara, daha and Shita jwara	B.P.Chi.1/790
12.	Maha Bilva Taila	Grahani Arsha, Atisara, chikitsa	B.P.Chi.2/112-114
13.	Pippalyadi lepa	Arsha ankura lepa	B.P.Chi.5/56
14.	Brihat Kasisadi Taila	-do-	B.P.Chi.5/62
15.	Udavartana andTaila	Vishuchika (Jatharagni vikaradhikara)	B.P.Chi.6/116
16.	Punarnavadi mandura	Pandu roga, Kamala, Hikka roga	B.P.Chi.8/30-34
17.	Dhumra pana	Hikka roga	B.P.Chi.13/20
18.	Vataka to retain in oral cavity	Trishna, Murchha chikitsa	B.P.Chi.18/24
19.	Nashya with Aja mutra	Murchha chikitsa	B.P.Chi.19/44
20.	Saraswata churna	Unmada chikitsa	B.P.Chi.22/46-49

21.	Maha chaitasa	-do-	B.P.Chi.22/51-61
22.	Brahmi ghrita	Apashmara chikitsa	B.P.Chi.23/18
23.	Taila Nasya	-do-	B.P.Chi.2/24
24.	Kalyanka avaleha	Vata vyadhi chikitsa	B.P.Chi.24/50
25.	Darusataka lepa	-do-	B.P.Chi.24/96
26.	Taila Mardana	Khalli chikitsa	B.P.Chi.24/158
27.	Mahabala Taila	Akshepaka chikitsa	B.P.Chi.24/171-180
28.	Maha masadi Taila	Vatavyadhi	B.P.Chi.24/226-272
29.	Madhyam Narayana Taila	-do-	B.P.Chi.24/281-290
30.	Maha Narayana Taila	-do-	B.P.Chi.24/291-312
31.	Mahayogaraja Guggulu	-do-	B.P.Chi.24/332
32.	Kusthadhya Taila pana	Urustambha adhikara	B.P.Chi.25/34
33.	Dwi Panchmulayadya Taila	-do-	B.P.Chi.25/46
34.	Maha Yogaraj Guggulu	Amvata adhikara	B.P.Chi.26/97-102
35.	Maha Rasona panda	-do-	B.P.Chi.26/108-112
36.	Brihata saindhvadi Taila	-do-	B.P.Chi.26/116-120
37.	Niruha vasti	-do-	B.P.Chi.26/122-128
38.	Lepa	Vata Kaphadhiya Vatrakta chikitsa	B.P.Chi.29/80
39.	Guduchi ghrita	-do-	B.P.Chi.29/96
40.	Satahawadi Taila	Vatarakta adhikara	B.P.Chi.29/118
41.	Guduchi Taila	-do-	B.P.Chi.29/132-137
42.	Lepa	Udarasoola nashaka	B.P.Chi.30/56

DISCUSSION

Saussurea lappa C.B. Clarke. is the original source of *Kustha*. It is well known drug since from *Vedic* period (*Atharvaveda*) to latest modern literature available about plants, but now a day the drug has come under endangered species. In classics, *Kustha* has been mentioned in those medications useful in skin disorder as a *Lepa/Pralepa*. The Asteraceae family comprises approximately 1000 genera and 30,000 species, distributed throughout the globe, of which approximately 177 genera and 1052 species are found in India (Rao et al., 1988). The genus *Saussurea* of the same family comprises about 300 species in the world of which about 61 species found in India (Hajra et al., 1995). *Saussurea lappa* is one of the best-known species within this genus (Jain, 1991). *Saussurea lappa* root and its oil has become an important drug in the international market (Bremer, 1994).

CONCLUSION

The present review on *Kustha* of both *Brihattryi* and *Laghutrayi* can be useful to know about different formulations of *Kustha*. By this way we can use *Kustha* in the treatment of different diseases. Most of the *Samhita Grantha* have mentioned it in the treatment of *Kustha*, *Shvitra* (skin disease), *Vata vyadhi* (epilepsy), *Arsha* (piles), *Mutrakricha* (difficulty in micturition), *Jvara* (fever) and *Vrana prasada* (wound healing). It use as *Rasayana* also. In this regard, further studies need to

carry out to explore *Kustha* for its therapeutics potential in preventing and treating diseases.
